The English-language and French-language services of Kol Israel (except shortwave) have alternated between the first and second domestic services. In the recent past they were carried in the first program up until 1962, at which time they went on the second program. ~~was carried~~ This has always taken the form of a domestic service and was not at all what was carried on the separate shortwave ^(INTERNATIONAL) transmissions.

They have now been switch^{ed} to the all-Arabic (previously) transmitters of which there are two 200kw jobs. It seems to me that they are trying to reach out with their English/French services a little more to the surrounding countries.

Since it is almost definitely not "to the Arab World" and is not on frequencies which would normally be listened to by Hebrew Israelis or Hebrew tourists I think it can only be called Jerusalem International Service in (Language).
